

ELISAD

Elisad is the European Association of Libraries and Information Services on Alcohol and Other Drugs.

The Elisad gateway

The gateway provides descriptions of and links to over 1100 evaluated European websites and other Internet resources, from 36 countries, on the use and misuse of drugs and other psychoactive substances. It is searchable in 17 different languages.

The evaluations have been done by subject experts and information professionals from 16 institutions across Europe including DrugScope, who have selected, classified and catalogued these Internet resources. The gateway can be searched free-text, through keywords and by country. A description of each resource and link is provided to help users assess its origin, content and nature.

This tool has been built by **ELISAD** the European Association of Libraries and Information Services on Alcohol and Other Drugs, with funding from the European Commission and is currently being updated. If you would like to have your site evaluated for possible inclusion, please email the URL and a brief description of the site's content to the webmaster on webmaster@drugscope.org.uk
